

*In our communities, opiate addiction is no longer confined to those who use “street drugs” such as Heroin. Often, the mental picture which comes to mind is a person in an alley shooting up. This is not the case any longer. The majority of our patients have gotten addicted to prescription drugs such as: Codeine, Dilaudid, Heroin, Hydrocodone, Lortab, Lorcet, Percocet, Percodan, Morphine, Oxycodone, and Oxycotin. More so, whatever you have in your medicine cabinet will probably be the most likely suspect.*

Listings are in Statewide Alphabetical order
